Level up super quick with this Rush Wars guide

If you haven't jumped into Supercell's new Rush Wars yet, let me tell you this: you're making a mistake. Rush Wars is finally available on iOS and Android, and you can jump in right now.

There is a technicality, and that is that you can only download Rush Wars if you have an account in a soft-launched territory, or just some skills to get it from another region than your own. **We'll leave that to you, though.**

Once you get into the game and know how to play, you'll want to get right into leveling up and getting access to more units. And that's exactly what this guide is for.

But EXP can feel tough to come across in Rush Wars, and if you don't use your resources wisely, it could take you even longer to get EXP. But we've got the information you need to get that all done as quickly as possible, so read on for more information on leveling up in Rush Wars.

Why get EXP

So, you need EXP to level up, that must be obvious, but why do you actually need to continually level up in this game? I mean, the experience of your units matters more than your player, right?

Well, yes and no. Your unit's level should be your main concern, sure, but your player level factors into many smaller aspects that will affect your impact in battle.

For one, leveling up your player level will give you access to more units, making the chests at the end of each fight way more valuable. Not bad at all.

Similarly, your own base will allow for more units to be placed in it as your player level goes up, meaning you'll earn more gold and stars from a successful defense.

All of this will accelerate your progress through the game, making it something you should actively look for. Get reading our following tips to level up as fast as possible
